Project Work:

- Project Name: Save Water During Floods.
- Technologies Used: Circuit designing using sensors

- **Project Description:** In this project, we are digging some tanks where the water flow is high during the floods. If water comes near the tank then we get a message through sensor and we will give permission to open the tank to fill out with water. Inside the tank we have a setup of cleaning and pumping to various municipality . By these e can save water and avoid floods. (All these operations are done by using sensors)
